

Bests Learners

1-Introduction

Bests Learners it would be an online school that will offer its members computer certifying courses and different content made by my team. The courses will be based on the needs of companies that is my team and I, we would move to them to discuss their problems and in addition we would follow job offers and review its offers to finally enrich our content and they are recruiting job seekers to help them better share a better qualification as a result of these proposed business candidates. Because my goal is to do my best to reduce poverty and unemployment in the world.

Technologies Using:

HTML5/CSS3;

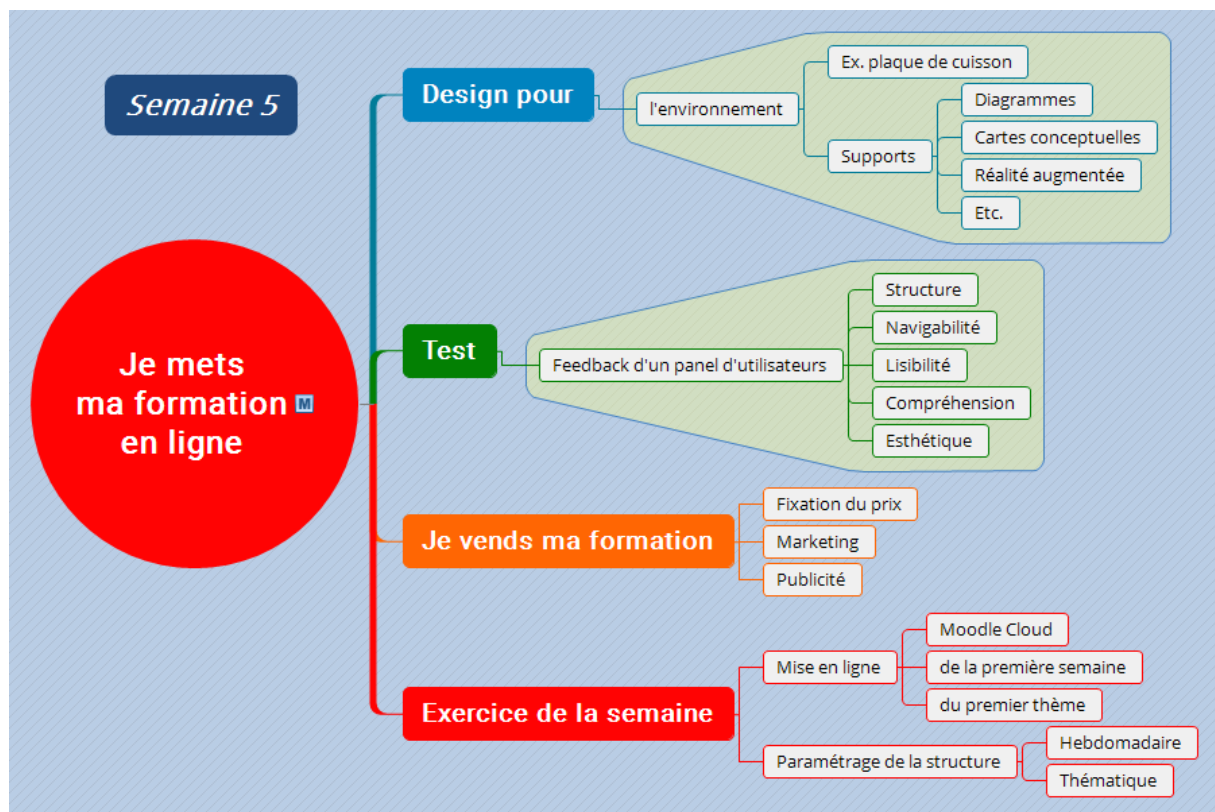

JavaScript;
